- ✓ Table tops
- ✓ Dishcloths
- ✓ Rubbish bins
- ✓ Fridges
- ✓ Ovens/Microwaves
- ✓ Chopping boards
- ✓ Floors & Walls

Revolution Disinfectant

Contains Aussan, an Australian Made, certified organic, food contact, safe Disinfectant, derived exclusively from natural and organic food grade ingredients. NASAA Certified Organic with all ingredients USA EPA GRAS listed.

How it Works

The active ingredient in Revolution Disinfectant is AUSSAN; a very effective, Bioflavonoid based formulation derived from fruit and vegetable extracts. Aussan is a non toxic organic replacement for chlorine, Quaternary Ammonium Compounds, peroxide and other chemical based disinfectants. Aussan will kill 99.99% of germs to the Australian Therapeutic Goods Administration standard test for Hospital Grade Disinfection (Option B). It is stable at pH levels from 2 to 12 and temperatures up to 60°C.

Safety Information

Revolution Disinfectant is not toxic to humans, animals and the environment. It is food contact safe and non-hazardous if it enters waterways. Aussan Revolution is non-corrosive and not hazardous if it comes into contact with skin. Keep out of reach of children. Avoid contact with eyes.

Directions for Use

Use only as directed in the table below. This product is safe to mix with detergents, and is non reactive, non flammable and non hazardous. Dilute for effective sanitisation on porous and non-porous surfaces.

Instructions for use	Dilute accordingly:	Properties
