Bitter Orange Extract 72968-50-4 (Bioflavonoid mixture)

**5 Litres**  
Makes up to 250L  
of surface sanitiser  
& deodoriser.

Code: OG30-W06 5Ltr

# Revolution™

**Organic Disinfectant/Deodoriser**

**Commercial Grade - Non Toxic**

**Use anywhere bad smells & bacteria may be found.**

Dilute as per table below for effective control of odours that are airborne, in liquids, soil or on porous or hard surfaces. Safe & non toxic – ideal for food storage areas.

**For both hard and porous surfaces.**

**Safe & effective to use in or on:**

- ✓ Public areas
- ✓ Agriculture
- ✓ Toilets & bathrooms
- ✓ Fabrics - suggest test first on lighter colours for staining
- ✓ Waste storage & processing
- ✓ Commercial buildings

**Revolution Disinfectant & Deodoriser**

Contains Aussan, an Australian Made, certified organic, non toxic disinfectant. To destroy odours, Revolution Disinfectant Deodoriser also contains an advanced odour control formulation based on highly effective botanical extracts proven to eliminate unpleasant smells. Does not mask bad smells but eliminates bacteria that causes bad smells. NASAA Certified Organic with all ingredients USA EPA GRAS listed.

**How it Works** The active ingredient in Revolution Disinfectant Deodoriser is AUSSAN; a very effective, Bioflavonoid based formulation derived from fruit and vegetable extracts. Aussan will kill 99.99% of germs to the Australian Therapeutic Goods Administration standard test for Commercial Grade Disinfection (Option C). It is stable at pH levels from 2 to 12 and temperatures up to 60°C. In combination with its odour control extracts this product kills germs and bacteria that cause bad smells and eliminates unpleasant odours associated with them, leaving behind a fresh natural vanilla scent.

**Safety Information** Revolution Disinfectant is not toxic to humans, animals and the environment. It is safe and non-hazardous if it enters waterways. Aussan Revolution is non-corrosive and not hazardous if it comes into contact with skin. Keep out of reach of children. Avoid contact with eyes.

**Directions for Use** Use only as directed in the table below. This product is safe to mix with detergents, and is non reactive, non flammable and non hazardous. Dilute for effective sanitisation and odour control on porous and non-porous surfaces.

Instructions for use	Dilute accordingly:	Properties
<b>Commercial Grade Disinfectant &amp; Odour Control</b> Use on bench tops, kitchen tidies, rubbish bins, buckets. Use on toilet seats and in bathrooms, wipe on or spray and leave to dry, no need to rinse.	Use undiluted	Passes Therapeutic Goods Administration standard test for Commercial Grade Disinfection (Option C). Kills 99.9% of germs. Non toxic and non hazardous. No need to rinse after use.
<b>Commercial Grade Sanitiser &amp; Odour Control</b> Mop or wipe over floors, walls kitchen bench tops or food preparation areas, children's toys, dishcloths and chopping boards (non porous) Leave on, no need to rinse.	Add 20 mL per litre of water	For household and general purpose sanitisation and odour control.
