# Organic Food Wash

## Non-Rinse - Food Safe

**Antibacterial - kills bacteria and food pathogens  
but is food safe and non toxic**

**Helps extend shelf life of fresh food**

**Made from 100% natural, food safe ingredients**

## Certified Organic

Made from food safe, natural antibacterial compounds

Wipe, spray or rinse/dip and leave to dry:

- ✓ Fruit and vegetables
- ✓ Meat, fish and chicken\*
- ✓ All food preparation areas and equipment

**No residual odours, colours or taste**

**BREAKTHROUGH  
REMOVES BACTERIA -  
HELPS PRESERVE**

Active Ingredients:  
Bitter Orange Extract 72968-50-4.  
(Bioflavanoid mixture)  
\* AQIS Approved IOA no 11306

**1 Litre  
Concentrate**  
Makes up to 50 Litres

### CONTAINS AUSSAN:

- Nature's secret weapon against germs
- Safe & non toxic to humans and the environment

**Australian Owned  
and Developed**

Non-Rinse  
**Food Wash**  
Non-Toxic - Organic

**Concentrate  
W1**

**Revolution Food Wash** contains AUSSAN a certified organic, food contact safe anti bacterial sanitiser, which is derived from natural and organic food grade ingredients. It can be used in a wide range of industries including food packing and processing, pharmaceutical, water treatment, catering, and many other applications. NASAA Certified Organic with all ingredients USA EPA GRAS listed.

**How it Works** - The active ingredient in **Revolution Food Wash is Aussan**; an effective, Bioflavonoid based formulation derived from plant extracts. **Aussan is a non toxic organic replacement for chlorine.** It is an excellent alternative to chlorine, hydrogen peroxide, peracetic acids, Quaternary Ammonium Compounds and other chemical based disinfectants for spraying or dipping of fruit and vegetables during processing. It provides safe and effective residual sanitising, without the risk of damage to delicate foods. It does not poison the organism but acts mechanically by destroying the cellular membrane of a micro-organism (cell wall intrusion). All ingredients are carried in a food safe naturally derived glycerine solvent which makes the active ingredients infinitely soluble in water. It does not taint or colour food when used at ready to use or manufacturers recommended concentrations. It is stable at pH levels from 2 to 12 and temperatures up to 60°C. **See MSDS, Independent Laboratory testing against food pathogens and TGA test results at [www.aussan.com.au](http://www.aussan.com.au)**

**Safety Information** - **Revolution Food Wash** is not toxic to humans, animals and the environment. It is food contact safe and non-hazardous if it enters waterways. Aussan Revolution is non-corrosive and not hazardous if it comes into contact with skin. Keep out of reach of children. Avoid contact with eyes.

**Directions for Use** - Spray or wipe on and leave. Leaves behind a food safe, non toxic film that removes bacteria and prevents it from multiplying to help give fresh food a longer shelf life. Use only as directed in the table below:

Function Required and Instructions	Dilute liquid according to function required	Properties
<b>SURFACE SANITISER</b> Sanitise Food Preparation Areas <b>SAFELY</b> without chemicals. Use to sanitise food preparation areas without the hazards, smell or corrosive properties of chlorine or chemical based cleaners.	Add 50 mL to 1 litre of water <b>OR</b> Add 25 mL to 500 ml of water	Removes and reduces germs and bacteria.  Non toxic and non hazardous. Leave on surface or soak in solution for a minimum of 10 minutes.
<b>FOOD WASH</b> Make fresh food safe and last longer. Spray, dip or wipe on food. Leave to dry, no need to rinse. Use to help preserve fresh food. Will not taint or discolour food. Leaves no residual taste or odour. Revolution Food Wash can remain on food for long lasting action against bacteria and fungus growth. Can be used on raw and cooked food.	20 mL to 1 litre of water	Removes and reduces food pathogens. Leave on surface for a minimum of 10 minutes.  Non toxic and non hazardous.

Australian Owned & Developed. Manufactured by Environmental Services Pty Ltd. 16 Halsey Road, Airport West VIC 3042. Exclusively for Roar Nature Laboratories Ltd. PO Box 757 Willoughby NSW 2068.
